Prerequisites	<i>None</i>
Language of instruction	<i>English</i>

Course description

Customer relationship management (CRM) is the mix of practices, strategies and technologies that companies use to manage and analyze customer interactions and data throughout the customer lifecycle. This Course intends to provide an insider's overview of how to analytically and strategically recognize, collaborate and deploy Customer Relationship Management in a company to maximize the value of and for each customer. Students should be able to understand how to transform customer information in effective and efficient communication and decision making processes, creating value through tools to support organizational intelligence.

Course aim

The course aims to provide the students the key concepts and methodologies for managing the customer relationship as well as key standards, technologies and systems that allow organizations to maintain, deepen and develop better relationships with their customers.

Learning outcomes

CLO7. Learn about the future trends in CRM	BLO2.1.	Lectures, Challenges, Class Participation, Group Work, Seminars, Exam	Lecture, Group homework, self- study

Quality management

The quality of the course is assured by the variety of teaching and learning methods, interim knowledge assessment through homework, continuous discussions of individual and group work, other assignment results, as well as by supply of learning materials to students.

Cheating issues

The teaching and testing methods are chosen taking into account the purpose of the minimization of cheating opportunities. Individual tasks are assigned. Task rotate year by year, from student to student. During the exam, some assistance is expected from the teaching staff (e.g. PhD students). The ISM regulations on academic ethics will be fully applied in the course.

Course content

FINAL GRADE COMPOSITION

Type of assignment	%
Group Components 45%	
Group Work Report and Oral Presentation	45%
Individual Components 55%	
Exam	30%
Class Participation and Challenges	25%
Total:	100

DESCRIPTION AND GRADING CRITERIA OF EACH ASSIGNMENT

- 1. Group Work Report and Oral Presentation.** This component evaluates the effectiveness of group projects through both written reports and oral presentations. The grading focuses on the depth and accuracy of the content presented, the organization and clarity of the report, as well as the delivery and engagement of the oral presentation. This assignment tests students' ability to work as a team, synthesize information, and present it in a compelling way to an audience.
- 2. Exam.** The Exam constitutes 30% of the total grade and is designed to assess individual understanding and mastery of the course content.
- 3. Class Participation and Challenges.** Class Participation and Challenges account for 25% of the total grade, emphasizing the importance of active engagement and responsiveness in the learning environment.

Students who receive a failing final grade shall have the right to re-take the exam, which will comprise 30% of the final grade and cover all topics of the course. Final exam result will be annulled.
